CLAIMS PROCESS

- Our process begins with a one on one consultation to discuss the facts, gather information and get a thorough understanding of the client's needs and goals. Our knowledgeable and enthusiastic legal team will explain the client's rights, options, and our processes. We ensure that our clients are comfortable and confident in our team and have a full understanding of our processes.
- Next, we'll request and review a certified copy of all applicable insurance policies to identify applicable coverages and exclusions, and confirm that all required post-loss conditions are met.
- With an understanding of the policy, we will gather and prepare the evidence to support the claim. We will collect correspondence and documents related to the claim, as well as photos, videos, and other evidence. We will confirm the value of the damages we are seeking and support it with a line item estimate. We work with a number of Industry-leading experts to serve as expert witnesses to support our clients' claims when necessary.
- After the policy and evidence are carefully analyzed, we present the claim to the insurance carrier and submit a formal demand package with timed deadlines to ensure prompt attention and response by the insurance carrier. The demand package includes all supporting evidence that the insurance carrier needs to pay the damages we are seeking. At this point we have made a strong case and will negotiate to obtain the best outcome for our client.
- If the insurance company does not agree to pay our client what is owed then we will file a lawsuit and use the tools of civil procedure to advance the matter to resolution. Throughout the litigation process we will continue to negotiate with the insurance carrier and relay any offers that are made to our client. Ultimately, we will proceed to trial if and when necessary to enforce our clients' rights.
- Our processes have been honed over the course of years based on our experience in handling thousands of successful claims. Each claim has unique facts, but our proven processes have helped us to create a system to maximize the value of each and every claim based on the merits.
- We invite you to reach out and learn more about our team, our process, and how we can help.

THE CLOCK IS TICKING!

NO FEES, NO COSTS IF WE DO NOT MAKE A RECOVERY FOR YOU

Florida Law Limits Policyholders To 1 Year (2 Years for certain policies) to File A Property Damage Claim.

You may not be aware of it, but there is a time limit for homeowners and policyholders to file a claim after a loss caused by a hurricane, storm, or other peril. The state of Florida allows policyholders a limited time after the date of the damage (loss) in which they may file an insurance claim. If you do not file a claim within the limited time period after the date when the damage occurred, then you will never be able to file a claim for that loss. Don't let the clock run out on you. If you suffered damage in a storm, let us work to get you the settlement you deserve.

CASE TIMELINE GUIDE

Our goal is to maximize your recovery based on the evidence under your policy. To achieve this, our primary focus is on building a strong case.

Below is a general claim timeline to help you better understand the process. This is not an exhaustive or step by step list, but merely a guide to help acquaint you with some of the processes we use.

CLAIM INVESTIGATION

We want to gather all of the available evidence so that we can make the strongest case for you. In most property damage cases, the strength of the evidence is the most important factor in a successful outcome. Where there is the right insurance policy coverage and the right type and extent of damage to the property, we are supremely confident that we will prevail.

AFTER A STORM

The following checklist will help you to make sure that you cover all the basics so you're ready to handle the complexities of making a property damage claim.

- Take numerous pictures** of your property before and after the storm to keep ready for use as evidence of your damage, or loss, in the event of a disaster striking.
- Request a certified copy of your insurance policy** from your insurer and keep it in a safe location just in case your property is damaged.
- Designate emergency contacts** and MAKE SURE to let them know where you will be after a hurricane or other disaster.
- Document any damaged items** and do not throw anything away, even if it is ruined. This may be needed later, as every item has potential value in an insurance claim.
- Secure your home or building** after property damage to prevent further damages.
- Hire a professional** to tarp damaged roofs and document all costs and expenses. Reach out to our office if you need help finding a licenced local contactor that you can trust.
- Keep personal property safe** by securing valuables and important documents; you may also wish to consider placing items in a secure storage facility temporarily.
- File a claim immediately** and retain legal representation, so that our law firm can be with you at every stage to ensure you are treated fairly by your insurance provider.
- Document your living expenses** in the days, weeks, or months after a disaster to record abnormal expenditures —such as hotels, food, or gas—made necessary by property damage.
- Keep current with bills** and continue making mortgage and insurance payments on time.
